

**Professional compacting of slabs, pavers and natural stone**

The perfect solution for compacting stone pavers in all kind of formats and materials.

A high capacity machine that levels and compact stones without breaking the material or edges.

This machine has been designed specifically for the challenging task of compacting slabs, pavers and natural stone.

ROLPAV produces vibration over surfaces with exceptional ease and gentleness. The smooth mode of operation embeds the material properly, while preventing shifting, cracking or chipping of stones. It minimizes dust that usually is created from compacting polymeric jointing sands. Polyurethane rubber coated rollers protect the surface at all times.

 **Features and benefits**

- Suitable for compacting pavers and slabs of large format.
- Allows compaction without scratching the slab or pavement
- Effective work even in hard to reach areas.
- Optimal weight distribution thanks to the four polyurethane rollers.
- Throttle mounted on the foldable.
- Operating handle.
- Centrally placed lifting eye.
- Honda GX160 engine.
